DETAILED ACTION

This office action is in response to the Amendment filed on June 04, 2007.

Applicant's cooperation in correcting the informalities in the Declaration is appreciated.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or renders obvious the claimed combination of a variable turbocharger having a housing, a compressor, a turbine, a compressor inlet, a compressor outlet, a turbine inlet, a chamber extending around the turbine, a bearing assembly, a sliding piston positioned between the turbine and the housing, a gap formed at a piston end positioned nearest the bearing assembly and being effective to control the amount of the exhaust gases thereby accurately controlling the turbine rotational speed and the amount conducted by the compressor, and including:

"at least one bypass aperture which is closed when the size of the gap is at a minimum and which opens when the gap reaches a predetermined size, the opening of the bypass aperture allowing exhaust gases that are not required for acting on the turbine to bypass the turbine and the sliding of the piston being such that the piston is always maintained in a position which enables the turbine speed to be controlled through the .clap alone when there is no bypass and through the gap and the bypass aperture when there is bypass."

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
